The Knowledge Engineering team at Bloomberg develops intelligent technologies focused on language and knowledge. This presentation will focus on a specific task at the intersection of the two, called Named Entity Disambiguation and how it is used at Bloomberg. Other knowledge-based technologies in use at Bloomberg will also be discussed.

Stefano Pacifico is a Senior Research Scientist in the Knowledge research group in Bloomberg L.P., and has matured significant experience in topics that include Knowledge Representation and Reasoning, Semantic Technologies and Software Engineering. Stefano leads the projects that fall in the above areas of expertise, including the Bloomberg Knowledge Platform and the Bloomberg Named Entity Disambiguation systems.

Wednesday, April 15, 2015
5:30pm to 6:30pm
Followed by a light reception in the lobby.
